PERSONAL STATEMENT

Joana is a creative and detail-oriented Frontend Developer passionate about crafting responsive, accessible, and user-friendly web and mobile applications. She thrives on building intuitive interfaces, integrating real-time features, and delivering seamless user experiences. Skilled in React, React Native, Next.js, TypeScript, Node.js and API integration, Thrives in collaborative, agile teams and consistently delivers high-quality digital solutions. She is committed to leveraging technology to deliver cutting-edge solutions that create meaningful impact for businesses and society.

KEY TECHNICAL SKILLS

- Proficient in JavaScript and the modern frontend ecosystem, including ReactJS, React Native, TypeScript, Next.js, and Vue.js for building scalable and high-performance user interfaces.
- Skilled in responsive UI development using HTML5, CSS3, Tailwind CSS, Styled Components, and component-driven architecture.
- Experienced in mobile development using React Native and Expo, including modular components, navigation, state management, and cross-platform optimization.
- Strong understanding of state management using Redux, Context API, React Query, and Pinia to build predictable and maintainable application logic.
- Experienced in authentication flows, secure routing, session handling, protected pages, and full API integration.

- Proficient with Git, GitHub, Firebase, Postman, and RESTful APIs for full-stack application development and testing.
- Familiar with Agile workflows, Scrum collaboration, sprint planning, and delivering features within fast development cycles.
- Skilled in implementing UI/UX principles, accessibility standards, pixel-perfect layouts, and design-to-code translation.
- Strong ability in data exploration, cleansing, validation, and transforming datasets for insights and reporting.
- Proficient in Python (Pandas, NumPy) for data analysis, automation, and scripting workflows.
- Knowledge of MySQL, PostgreSQL, database queries, schema design, and data modeling concepts.
- Experienced in Excel, Google Sheets, and spreadsheet-based analytics and reporting.
- Sound understanding of statistical concepts, trend analysis, and data-driven decision-making.
- Quality Assurance & Testing: test planning, writing and executing test cases, debugging, bug reporting, and validating system behavior across environments.
- Experienced in optimizing frontend performance, debugging UI issues, improving load time, and strengthening code reliability.
- Skilled in data visualization using Google Looker Studio, Power BI, Tableau, Amazon QuickSight, SQL, and Google Analytics.
- Able to design and develop interactive dashboards and visual reports that support clear, actionable decision-making.

WORK EXPERIENCE

Software Developer | Kapsule

Oct 2022 – Jul 2025 / Rwanda & Hybrid

Key achievements

- Developed a Pharmaceutical POS System using React, Node.js, and Firebase, enhancing pharmacy sales tracking and inventory management, boosting operational efficiency by 18% https://github.com/Mundurujoana/Pharm-POS-System
- Built a health data mapping system with React and Node.js, integrating Leaflet maps, interactive filters, and real-time API data to visualize districts and health facilities. Enabled users to search, filter, and access detailed health statistics, supporting informed decision-making and resource allocation https://github.com/Mundurujoana/viebeg_admin_frontend
- Developed a user authentication system using Firebase and React, enabling secure sign-up, login, and session management for web applications. Implemented best practices for authentication flows, state management, and user experience https://github.com/Mundurujoana/auth-frontend
- Implemented frontend pages for iGiTREE using React and Node.js, a cultural heritage platform in Rwanda that allows users to build family trees, fostering cultural preservation, curiosity, and identity pride https://igitree.rw/
- Developed and optimized frontend features for Content is Queen using Next.js and Node.js, a podcasting platform amplifying minority voices and improving user engagement https://contentisqueen.org/, https://github.com/content-is-queen/creator-platform-frontend, https://github.com/Mundurujoana/creator-platform-backend
- Conducted comprehensive testing and quality assurance on the Kapsule Global Health Dashboard application, ensuring system reliability, scalability, and seamless user experience https://kapsule-terminal.web.app/dashboard
- Developed the Medical Questions Category Project, enabling real-time retrieval and management of questions by category using React and Firebase. Implemented dynamic routing, responsive tables, and admin controls to streamline content access, improve user experience, and optimize administrative workflows https://github.com/Mundurujoana/medical-questions-category-project
- Reviewed code, validated new features, and fixed bugs across applications, contributing to a 12% increase in healthcare contributions and an 18% improvement in system performance

---

Frontend & Mobile Developer | HNG13 Internship

2025 (Remote) | Lagos, Nigeria

- React Native Todo App: Cross-platform app with CRUD, drag-and-drop tasks, filters, theme switching, and modular components using React Native, Convex, and styled-components.
  https://github.com/Mundurujoana/hng13-react-native-todolist-app

- Ticket Management App – React Version: Full CRUD web app with authentication, dashboards, localStorage session management, and responsive UI.
  https://github.com/Mundurujoana/hng13-react-ticketapp

- Ticket Management App – Vue Version: Built with Vue.js, Pinia, and Vue Router; included reusable components, dynamic filters, and responsive layouts.
  https://github.com/Mundurujoana/hng13-vue-ticketapp

- Ticket Management App – Twig Version: Template-based version focusing on semantic HTML, reusable UI blocks, and accessibility-driven CSS.
  https://github.com/Mundurujoana/hng13-twig-ticketapp

Software Developer | CodeHive X AkiraChix

January 2022 – November 2025 | Kigali, Rwanda

Key achievements

- Non-Adherence to TB medication in Kenya: A research documentation on inconsistent adherence to Tuberculosis medication in Kenya, as one of the leading causes of death among the people of Kenya.
  https://docs.google.com/document/d/1iaXuUkhmCtj2myudOgKxQSukMpsDcwWX0SzNyr42upE/edit?tab=t.0

- DigitalWallet: Currently using Django framework to build a wallet App to securely store digital debit and credit cards so that the user doesn't have to enter card information or carry a physical card at all to make purchases.

https://github.com/Mundurujoana/OOPpython/tree/main

- Coffee web-store : Used Html, CSS, JS to build an online shop that provides different types of coffee types and packages, so that users can choose a variety of choices. https://github.com/Mundurujoana/coffee-website-html-css-js

- Workout Mobile Application: Used Kotlin to build a workout mobile App to help users track and maintain their personal health goals. https://github.com/Mundurujoana/workoutlog
